2.2 Basic Information

The state of Bihar has close to 70,000 elementary schools, teaching about 20 million children. The state has a total of about 343,000 teachers out of which nearly 257,000 are contract teachers that have been hired by the Panchayats (local bodies at the village level) – a significant number of which are not trained. The state needs to hire another 205,000 teachers to meet Right to Education (RTE) norms. Recognizing the importance of teacher quality, the Government of Bihar (GoB) has embarked on a major reform in the area of teacher development and management, continuous professional development and social accountability.

Given the challenge of a huge cadre of untrained teachers in the state, and taking lessons from the earlier initiatives, Govt. of Bihar now wishes to address this issue through a professionally delivered distance education program for pre-service teacher education that would use Information and Communication Technology (ICT) resources substantively and integrally.

Govt. of Bihar intends to create/ramp up 'Teacher Education' institution capacity and also roll out ICT platform as a tool to achieve professional development and management of the teachers.

The ICT is seen as both a tool to help the trainers reach, support and monitor the large student teacher base as well as an instrument to directly

support teaching and learning. Although the needs of training and certifying the huge backlog of untrained teachers driving the system design, it is also envisaged to meet the long-term objective of GOB, by building a robust and sustainable system for teacher professional development in the state. It is proposed that the system shall not only be used for delivery of teacher education and certification, but also a growing range of other pre-service programmes and continuing professional development (CPD) activities.

Presently teacher education program in the state of Bihar is under the aegis of State Council of Educational Research and Training (SCERT), Department of Education, GOB. SCERT through various centres such as District Institute of Education and Training (DIET), Primary Teacher Education College (PTEC), Block Resource Centre (BRC) and Cluster Resource Centre (CRC) implements teacher education programmes.

As a part of this initiative, it is envisaged to set up ICT labs/study centres in approximately 250 centres spread across the state. Govt. of Bihar intends to roll out this in phases with the first phase comprising of setting up of ICT labs/study centres in 25 locations within the state. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In addition, the document outlines the procedures for handling discrepancies. If there is a difference between the recorded amount and the actual amount received or paid, it is crucial to investigate the cause immediately. This could be due to a clerical error, a missing receipt, or a more serious issue like fraud.

The second part of the document provides a detailed breakdown of the accounting cycle. It lists the ten steps involved in the process, from identifying the accounting entity to preparing financial statements. Each step is explained in detail, including the necessary documents and the order in which they should be processed.

Finally, the document concludes with a summary of the key points discussed. It reiterates the importance of accuracy, transparency, and regular audits. It also provides contact information for the accounting department for any further inquiries.

The following table provides a summary of the financial data for the period covered by this report. It includes the total revenue, total expenses, and the resulting net profit.

Category	Amount
Total Revenue	\$1,250,000
Total Expenses	\$850,000
Net Profit	\$400,000

The data shows a steady increase in revenue over the period, which is a positive sign for the company. However, there is a concern regarding the increase in expenses, particularly in the area of marketing and sales. It is recommended that the company review these areas to find ways to reduce costs without compromising quality.

Overall, the financial performance for the period is considered satisfactory. The company has managed to maintain a healthy profit margin despite the challenges faced in the market.

The document concludes with a statement of approval from the Chief Financial Officer. It states that the financial statements are true and accurate to the best of their knowledge.

2. Background Information

2.1 Basic Information

a) Government of Bihar invites responses ("Tenders") to this Request for Proposal ("RFP") from Original Equipment Manufacturer (OEM) agencies/authorized partners ("Bidders") for the provision of **Supply, installation, configuration, LAN set UP and maintenance of Information and Communication Technology Hardware's for establishment of ICT Labs at Teacher Education Centre's** as described in the section 3.12 of this RFP ("Scope of Work"). Bihar State Educational Infrastructure Development Corporation Limited (BSEIDC) is the Nodal Agency for this government procurement competition (the "Nodal Agency").

b) Any contract that may result from this RFP Process will be issued for a term of 5 years (the "Term") which would include the hardware Supply, installation, Configuration, LAN Set UP, maintenance and warranty support.

2.2 Basic Information

The state of Bihar has close to 70,000 elementary schools, teaching about 20 million children. The state has a total of about 343,000 teachers out of which nearly 257,000 are contract teachers that have been hired by the Panchayats (local bodies at the village level) – a significant number of which are not trained. The state needs to hire another 205,000 teachers to meet Right to Education (RTE) norms. Recognizing the importance of teacher quality, the Government of Bihar (GoB) has embarked on a major reform in the area of teacher development and management, continuous professional development and social accountability.

Given the challenge of a huge cadre of untrained teachers in the state, and taking lessons from the earlier initiatives, Govt. of Bihar now wishes to address this issue through a professionally delivered distance education program for pre-service teacher education that would use Information and Communication Technology (ICT) resources substantively and integrally.

Govt. of Bihar intends to create/ramp up 'Teacher Education' institution capacity and also roll out ICT platform as a tool to achieve professional development and management of the teachers.

The ICT is seen as both a tool to help the trainers reach, support and monitor the large student teacher base as well as act as an instrument to directly

support teaching and learning. Although the needs of training and certifying the huge backlog of untrained teachers driving the system design, it is also envisaged to meet the long-term objective of GoB, by building a robust and sustainable system for teacher professional development in the state. It is proposed that the system shall not only be used for delivery of teacher education and certification, but also a growing range of other pre-service programmes and continuing professional development (CPD) activities.

Presently teacher education program in the state of Bihar is under the aegis of State Council of Educational Research and Training (SCERT), Department of Education, GoB. SCERT through various centres such as District Institute of Education and Training (DIET), Primary Teacher Education College (PTEC), Block Resource Centre (BRC) and Cluster Resource Centre (CRC) implements teacher education programmes.

As a part of this initiative, it is envisaged to set up ICT labs/study centres in approximately 250 centres spread across the state. Govt. of Bihar intends to roll out this in phases with the first phase comprising of setting up of ICT labs/study centres in 25 locations within the state. Govt. of Bihar proposes to select a vendor to Supply, installation, Configuration, LAN Set UP and maintain ICT hardware's at identified Teacher Education centre at various locations in the state.
