2. Background information

2.1. Basic information:

- a) Government of Bihar invites responses ("Tenders") to this Request for Proposal ("RFP") from Original Equipment Manufacturer (OEM) agencies/authorized partners ("Bidders") for the provision of Information and Communication Technology Hardware as described in the section 3.12 of this RFP ("Scope of Work"). Bihar State Educational Infrastructure Development Corporation Limited (BSEIDC) is the Nodal Agency for this government procurement competition (the "Nodal Agency")
- b) Any contract that may result from this RFP Process will be issued for a term of 5 years (the "Term") which would include the hardware supply, warranty and maintenance support.

2.2. Project background:

The state of Bihar has close to 70,000 elementary schools, teaching about 20 million children. The state has a total of about 343,000 teachers out of which nearly 257,000 are contract teachers that have been hired by the Panchayats (local bodies at the village level) – a significant number of which are not trained. The state needs to hire another 205,000 teachers to meet Right to Education (RTE) norms. Recognizing the importance of teacher quality, the Government of Bihar (GoB) has embarked on a major reform in the area of teacher development and management, continuous professional development and social accountability.

Given the challenge of a huge cadre of untrained teachers in the state, and taking lessons from the earlier initiatives, Govt. of Bihar now wishes to address this issue through a professionally delivered distance education program for pre-service teacher education that would use Information and Communication Technology (ICT) resources substantively and integrally.

Govt. of Bihar intends to create/ramp up 'Teacher Education' institution capacity and also roll out ICT platform as a tool to achieve professional development and management of the teachers.

The ICT is seen as both a tool to help the trainers reach, support and monitor the large student teacher base as well as act as an instrument to directly support teaching and learning. Although the needs of training and certifying the huge backlog of untrained teachers driving the system design, it is also envisaged to meet the long-term objective of GoB, by building a robust and sustainable system for teacher professional development in the state. It is proposed that the system shall not only be used for delivery of teacher education and certification, but also a growing range of other pre-service programmes and continuing professional development (CPD) activities.

Presently teacher education program in the state of Bihar is under the aegis of State Council of Educational Research and Training (SCERT), Department of Education, GoB. SCERT through various centres such as District Institute of Education and Training (DIET), Primary Teacher Education College (PTEC), Block Resource Centre (BRC) and Cluster Resource Centre (CRC) implements teacher education programmes.

As a part of this initiative, it is envisaged to set up ICT labs/study centres in approximately 1200 centres spread across the state. Govt. of Bihar intends to roll out this in phases with the first phase comprising of setting up of ICT labs/study centres in 150 locations within the state.

Govt. of Bihar proposes to select a vendor to supply, install and maintain ICT hardware's at identified Teacher Education centre at various locations in the state.
